Thursday, June 21, 2018

10:30am - 11:30am (EDT)

Covestro: Booth 5057LL

[W 35th Street & 11th Avenue, New York, NY 10001](http://maps.google.com/maps/?q=W%2035th%20Street%20%26%2011th%20Avenue%2C%20New%20York%2C%20NY%2010001)  (<http://maps.google.com/maps/?q=W%2035th%20Street%20%26%2011th%20Avenue%2C%20New%20York%2C%20NY%2010001>)

DESCRIPTION

Offsite construction can be a useful tool for minimizing costs and increasing sustainability performance. In residential construction, these benefits can be multiplied with wall panels. Innovative new wall-panel technology installs both the insulation and the weather-resistive barrier in the offsite plant, providing additional efficiencies to the construction site. It is also adaptable to meet insulation requirements in climate zones 1 through 8. Join this informative session to review market dynamics that are driving the demand for moving more of the construction process offsite. You'll be introduced to emerging panelization technology that has particularly helpful benefits for single and multifamily homes.
