DESCRIPTION

A custom residence can be the highlight of your architectural practice-but your relationship with the client homeowner might not be. Believe it or not, your contract can be the ideal vehicle for aligning expectations. Join us to cover the fundamental components of a good contract. You'll learn to use it as a tool to discuss responsibilities, scope, and compensation. You might even be enticed to use a standard form agreement from AIA-and finally ditch that letter form that you've cobbled together over the years.
